

Internet Map Assignment

The goal of this exercise is to create an Internet Map to meet a specific purpose. Your job is first to define a purpose for the map, then to create a map that meets the requirements demanded by that purpose. The map can be created either using MapServer or Google Earth/KML.

Grading of the assignment will consider the following:

- a. Purpose – Does the map provide the needed information and features to fulfill its purpose?
- b. Good use of symbols, colors, labels etc.
- c. Appropriate use of interactive features
- d. Demonstrated mastery of the technical elements needed to create the map
- e. Overall map layout
