|   |     |
|---|-----|
| <b>ACKNOWLEDGEMENTS</b> .....   | ii  |
| <b>LIST OF TABLES</b> .....   | vi  |
| <b>LIST OF FIGURES</b> .....  | vii |
| <b>Chapter I: INTRODUCTION</b> .....  | 1   |
| <b>OVERVIEW OF THE RESEARCH PROBLEM</b> .....   | 1   |
| <b>STUDY OBJECTIVES</b> .....   | 4   |
| <b>INTRODUCTION TO THE STUDY AREA</b> .....   | 5   |
| <i>The barrier island ecosystem</i> .....   | 5   |
| <i>The study site</i> .....   | 5   |
| <i>The Chronosequence</i> .....   | 9   |
| <b>METHODS</b> .....  | 12  |
| <i>Field study design</i> .....   | 13  |
| <i>Decay measurements</i> .....   | 15  |
| <i>Environmental measurements</i> .....   | 16  |
| <b>Chapter II: THE INFLUENCE OF ENVIRONMENT AND LITTER<br/>QUALITY ON ROOT DECOMPOSITION DYNAMICS</b> ..... | 18  |
| <b>INTRODUCTION</b> .....   | 18  |
| <b>METHODS</b> .....  | 20  |
| <i>Study design</i> .....   | 20  |
| <i>Statistical analyses</i> .....   | 20  |

|   |    |
|---|----|
| RESULTS.....  | 21 |
| <i>Environmental gradients</i> .....  | 21 |
| <i>Environmental influences on decay dynamics</i> .....   | 28 |
| <i>Native root decay across the chronosequence</i> .....  | 35 |
| <i>Root ingrowth</i> .....  | 43 |
| <i>Influence of litter quality on decay</i> .....   | 45 |
| <i>Changes in litter quality during decay</i> .....   | 49 |
| DISCUSSION.....   | 52 |
| <i>Influences on belowground rates of mass loss</i> .....   | 52 |
| <i>Influences on nutrient and carbon dynamics</i><br><i>during belowground decomposition</i> .....        | 54 |
| <b>Chapter III: THE INFLUENCE OF NITROGEN AVAILABILITY</b><br><b>ON ROOT DECOMPOSITION DYNAMICS</b> ..... | 60 |
| INTRODUCTION .....  | 60 |
| METHODS.....  | 62 |
| RESULTS.....  | 63 |
| <i>Soil responses to fertilization</i> .....  | 63 |
| <i>Response of decay dynamics to fertilization</i> .....  | 65 |
| <i>Response of root ingrowth to fertilization</i> .....   | 74 |
| DISCUSSION.....   | 77 |
| <b>Chapter IV: CONCLUSIONS</b> .....  | 80 |
| <b>LITERATURE CITED</b> .....   | 84 |

## **APPENDICES**

1. Landscape variability study..... 95
2. Aboveground decay study..... 102

## LIST OF TABLES

### TABLE

|     |   |    |
|-----|---|----|
| 1.  | Soil redox potential (Eh), soil pH, soil temperature, soil water salinity and groundwater level across dunes. ....  | 24 |
| 2.  | Soil redox potential (Eh), soil pH, soil temperature, soil water salinity and groundwater level across swales. .... | 25 |
| 3.  | Nutrient and organic matter gradients across dune chronosequence. ....  | 29 |
| 4.  | Nutrient and organic matter gradients across swale chronosequence. ....   | 30 |
| 5.  | Decay rates for <i>Spartina patens</i> roots incubated across dune and swale chronosequences. ....                  | 32 |
| 6.  | Decay rates for <i>Spartina patens</i> decay at each depth interval. ....   | 34 |
| 7.  | Decay rates for native roots incubated across dune and swale chronosequences. ....                                  | 37 |
| 8.  | Decay rates for native root decay at each depth interval. ....  | 41 |
| 9.  | Average root ingrowth density from native root litterbags. ....   | 44 |
| 10. | Initial litter quality indices (0) and after 1.7 years of decay ....  | 46 |
| 11. | Percent lignin remaining in <i>Spartina patens</i> roots and native roots after 1 year of decay. ....               | 51 |
| 12. | Soil responses to fertilization. ....   | 64 |
| 13. | Decay rates across dune chronosequence in response to fertilization. ....   | 66 |
| 14. | Percent lignin remaining in response to fertilization. ....   | 69 |
| 15. | Effects of fertilization on decay rates for depth intervals across the dune chronosequence. ....                    | 70 |
| 16. | Initial litter quality indices and after 1.7 years of decay. ....   | 73 |
| 17. | Effects of fertilization on average root ingrowth density. ....   | 76 |

## LIST OF FIGURES

### FIGURE

|     |  |    |
|-----|--|----|
| 1.  | Location of Hog Island within the Virginia Coast Reserve .....   | 7  |
| 2.  | Location of transect on Hog Island.....  | 8  |
| 3.  | Hog Island Chronosequence.....   | 11 |
| 4.  | Map view of sampling areas.....  | 14 |
| 5.  | Annual hydrographs (February 1991 to February 1992) for 24, 36<br>and 120 year dunes and swales.....         | 24 |
| 6.  | Soil redox potential measured over depth from February 1991 to<br>February 1992.....                         | 27 |
| 7.  | <i>Spartina patens</i> decay dynamics across the 24, 36 and 120 year dune<br>and swale chronosequence: ..... | 33 |
| 8.  | Native root decay dynamics across dune chronosequence: .....   | 39 |
| 9.  | Native root decay dynamics across swale chronosequence: .....  | 40 |
| 10. | Effect of fertilization on percent mass remaining.....   | 69 |
| 11. | Effect of fertilization on percent nitrogen remaining. ....  | 74 |
| 12. | Effect of fertilization on percent phosphorus remaining .....  | 77 |
